
Historical and probable maximum future availability of ZERs
Possible Range
Non-Emitting Electricity, EJ/yr
Supply trajectories:
Nuclear
Hydro
Solar
Wind
Geothermal
Probable Maximum Future Availability
Accumulated Demands
Historical Availability
Demand
Supply
Sustainable Biomass, Gt/yr
Supply trajectories:
Wood materials
Crops for food
Biomass for livestock
Biomass as fuel
Accumulated Demands
Supply: Maximum sustainable biomass for all uses
Demand
S.
Carbon Storage, Gt CO2e/yr
Supply of geological storage
Accumulated Demands
Likely risk of supply shortage
Demand
S.
